The aries 4-Way Table is designed as a “stand alone” system, consisting of plug-in cables and a single board interface compatible with all standard x-ray equipment.

The tabletop electromagnetic locks are released by applying pressure to pedals located at front of the table.

With the aries Table, the operator can easily and quietly position a patient weighing up to 600 pounds.

In unique applications, optionally, the foot pedal controls can be configured to function only when an auxiliary button is depressed.

The aries accepts cassettes, CR or DR solutions.

Specification: (Model No: 04-000)

Tabletop:	84" x 30.25"
Tabletop Height	30"
Side Clearance:	17"
Front & Rear Clearance:	5"
Cassette Holder Travel:	20"
